# **2019**

**Mathematics**  
**Grade 2**

---

Approved by the Cedar Grove Board of Education  
November 2019

Superintendent of Schools  
Michael Fetherman

Board of Education  
Mrs. Christine Dye, President  
Mr. David Schoner, Vice-President  
Mr. Leonard Splendoria  
Mrs. Nicole DiChiara  
Mrs. Michele Mega

# Mathematics

## Grade 2

In Grade 2, instructional time should focus on four critical areas: (1) extending understanding of base-ten notation; (2) building fluency with addition and subtraction; (3) using standard units of measure; and (4) describing and analyzing shapes.

1. Students extend their understanding of the base-ten system. This includes ideas of counting in fives, tens, and multiples of hundreds, tens, and ones, as well as number relationships involving these units, including comparing. Students understand multi-digit numbers (up to 1000) written in base-ten notation, recognizing that the digits in each place represent amounts of thousands, hundreds, tens, or ones (e.g., 853 is 8 hundreds + 5 tens + 3 ones).
2. Students use their understanding of addition to develop fluency with addition and subtraction within 100. They solve problems within 1000 by applying their understanding of models for addition and subtraction, and they develop, discuss, and use efficient, accurate, and generalizable methods to compute sums and differences of whole numbers in base-ten notation, using their understanding of place value and the properties of operations. They select and accurately apply methods that are appropriate for the context and the numbers involved to mentally calculate sums and differences for numbers with only tens or only hundreds.
3. Students recognize the need for standard units of measure (centimeter and inch) and they use rulers and other measurement tools with the understanding that linear measure involves an iteration of units. They recognize that the smaller the unit, the more iterations they need to cover a given length.
4. Students describe and analyze shapes by examining their sides and angles. Students investigate, describe, and reason about decomposing and combining shapes to make other shapes. Through building, drawing, and analyzing two- and three-dimensional shapes, students develop a foundation for understanding area, volume, congruence, similarity, and symmetry in later grades.

This curriculum was written in accordance with the  
**NEW JERSEY STUDENT LEARNING STANDARDS**  
for Mathematics  
and the  
**NEW JERSEY STUDENT LEARNING STANDARDS**  
for 21<sup>st</sup> Century Life and Careers

The standards can be viewed at

<http://www.state.nj.us/education/cccs/2016/math/standards.pdf>

<https://www.nj.gov/education/cccs/2014/career/>

# Grade 1 Overview

## Operations and Algebraic Thinking

- Represent and solve problems involving addition and subtraction.
- Add and subtract within 20.
- Work with equal groups of objects to gain foundations for multiplication.  
[Number and Operations in Base Ten](#)
- Understand place value.
- Use place value understanding and properties of operations to add and subtract.

## Measurement and Data

- Measure and estimate lengths in standard units.
- Relate addition and subtraction to length.
- Work with time and money.
- Represent and interpret data.

## Geometry

- Reason with shapes and their attributes.

## Mathematical Practices

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

## **Grade 2 - Scope and Sequence**

<b>Unit 1</b>	<b>September – October</b>
<b>Unit 2</b>	<b>November – January</b>
<b>Unit 3</b>	<b>January – February</b>
<b>Unit 4</b>	<b>March – April</b>
<b>Unit 5</b>	<b>April – June</b>

# Mathematics - Grade 2

## Unit 1: Add and Subtract Within 100 and Understand Place Value to 1000

### 21<sup>st</sup> Century Themes

Creativity and Innovation

Critical Thinking and Problem Solving

Communication

Collaboration

### Career Ready Practices

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP6. Demonstrate creativity and innovation

CRP7. Employ valid and reliable research strategies.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP11. Use technology to enhance productivity.

### Unit 1 Learning Targets

#### Students will be able to...

- *Construct, identify and compare sets of numbers to 1,000 using manipulatives to show quantity (M) Identify the number of ones, tens and hundreds in a two or three digit number and determine the value of each digit*
- *Read and write words that represent one, two and three digit numbers*
- *Use groups of tens to estimate quantities to 100*
- *Estimate and explain the reasonableness of a sum or difference by the magnitude of the answer Round to the nearest group of ten when estimating*
- *Distinguish between answers that use estimation and those that are exact*
- *Express two and three digit numbers in expanded form*
- *Compare and order one, two and three digit numbers applying place value concepts and using the symbols  $>$ ,  $=$*
- *Identify the ordinal position to 31<sup>st</sup>*
- *Identify even and odd in one or two digit numbers using the concept of partners or using the ones place digit*
- *Show a given whole number in equivalent ways (63,  $60 + 3$ ,  $57 + 6$ )*
- *Take apart a whole number as a grouping of ones and tens in different ways (63, 6 tens 3 ones, 5 tens 13 ones)*
- *Use zero to represent a value*
- *Add and subtract within 20 to solve one and two step word problems with unknowns in any position.*
- *Represent a 3-digit number as specific amounts of 100s, 10s, and 1s.*
- *Identify ten tens as 100 and represent two hundred, three hundred,....nine hundred with 2, 3,.....9 hundred bundles (with zero tens and zero ones).*
- *Skip count by 5s and 10s up to 100....beginning at any multiple of 5.*
- *Read numbers to 1000 using base-ten numerals, number names, and expanded form.*
- *Write numbers to 1000 using base-ten numerals, number names, and expanded form.*

- Use symbols  $, =$ , to record the results of comparing two 3-digit numbers by decomposing the number into a number of 100s, 10s, and 1s

#	Student Learning Objectives	NJSLS	Learning Activity
1	Add and subtract within 20 to solve 1- and 2-step word problems with unknowns in any position.	2.OA.1	<ul style="list-style-type: none"> <li>• Create a Math foldable of repeated equal addends strategies (equal groups, array, repeated addition, skip counting, and number lines.</li> <li>• Make skyscraper cities with window arrays. Have children label their building to represent the repeated addition equation.</li> <li>• Read <u>Math for All Seasons</u> by Greg Tang for math riddles with repeated addition.</li> </ul>
2	Represent a 3-digit number as specific amounts of 100s, 10s, and 1s.	2.NBT.1	<ul style="list-style-type: none"> <li>• Have children work in pairs using standard measurement tools to estimate and measure lengths of objects in the classroom. Explain how they estimated or measured the objects.</li> <li>• Use Grab and Go! How Long? Game to practice estimating and measuring length.</li> </ul>
3	Identify ten tens as 100 and represent two hundred, three hundred, ..., nine hundred with 2, 3, ..., 9 hundred bundles (with zero tens and zero ones).	2.NBT.1	<ul style="list-style-type: none"> <li>• Have children measure the lengths of objects in 2 different units of measure to explore the inverse relationship between size and number of units.</li> <li>• Measure objects using paperclips and unifix cubes and compare the measurements.</li> </ul>
4	Skip count by 5s and 10s up to 100 ... beginning at any multiple of 5.	2.NBT.2	<ul style="list-style-type: none"> <li>• Using various standards of measure, measure two objects in the classroom using same measurement tool and compare lengths using the vocabulary longer, or shorter to compare.</li> <li>• Measure objects in room using unifix cubes and compare lengths.</li> </ul>

5	Read numbers to 1000 using base-ten numerals, number names, and expanded form.	2.NBT.3	<ul style="list-style-type: none"> <li>Do jumping jacks while counting by 5s, 10s, and 100s.</li> <li>Orally count within 1000.</li> </ul>
6	Write numbers to 1000 using base-ten numerals, number names, and expanded form.	2.NBT.3	<ul style="list-style-type: none"> <li>Use triangular flashcards with partners to add or subtract.</li> <li>Roll two dice to represent an equation and have partners add or subtract and verbalize different strategies they used to solve.</li> </ul>
7	Use symbols $>$ , $=$ , $<$ , to record the results of comparing two 3-digit numbers by decomposing the number into a number of 100s, 10s, and 1s.	2.NBT.4	<ul style="list-style-type: none"> <li>Timed math quiz</li> <li>Magic Number</li> <li>Magic Square grid - using either addition or subtraction, children must fill in the missing numbers in the grid; so that all columns, rows and diagonals totals are equal (the magic number).</li> </ul>

### Selected Opportunities for Connection to Mathematical Practices

**1. Make sense of problems and persevere in solving them.**

SLO #1 Analyze the information given and relationships in addition and subtraction word problems.

SLO #4 Analyze the initial number or sequence given to skip count by 5s.

SLO #7 Analyze the information given to understand the relationships between two 3-digit numbers.

**2. Reason abstractly and quantitatively.**

3. SLO #1 Understand and make sense of the quantities in word problems.

SLO #4 Understand and make sense of the relationship among the numerical values when skip counting by 5s.

SLO #7 Make sense of the quantities and their relationship to each other when comparing two 3-digit numbers.

**4. Construct viable arguments and critique the reasoning of others.**

SLO #7 Create an argument using  $<$ ,  $>$ , or  $=$  symbols when comparing two 3-digit numbers.

**5. Model with mathematics.**

SLO #1 Apply previously learned mathematical skills to solve 1 and 2-step addition and subtraction word problems.

SLO #4 Apply previously learned skip counting skills to skip count by 5 up to 100.

**6. Use appropriate tools strategically.**

**7. Attend to precision.**

SLO #7 Understand the meaning of the  $<$ ,  $>$ , or  $=$  symbols when comparing two 3-digit numbers. Use the aforementioned symbols appropriately and consistently.

**8. Look for and make use of structure.**

SLO #2 Understand the pattern of decomposing numbers when representing 3-digits numbers

SLO #3 Understand the structure when identifying and representing bundles of ten tens.

SLO #7 Understand the pattern regarding place value and decomposition when comparing two 3-digit numbers.

Look for and express regularity in repeated reasoning.

Unit 1 Essential Questions	Unit 1 Enduring Understandings
<ul style="list-style-type: none"> <li>● <i>How does the position of a digit in a number affect its value?</i></li> <li>● <i>In what different ways can numbers be grouped?</i></li> <li>● <i>What are strategies to make a reasonable estimate?</i></li> <li>● <i>How do operations affect numbers?</i></li> <li>● <i>How is an equation like a balance scale?</i></li> <li>● <i>How do you use addition and subtraction to solve real world problems?</i></li> <li>● <i>How does the position of a digit in a number affect its value?</i></li> <li>● <i>How can we compare and contrast numbers?</i></li> </ul>	<ul style="list-style-type: none"> <li>● <i>The position of a digit in a number determines its value.</i></li> <li>● <i>The groupings of ones, tens and hundreds for a given number can be taken apart in different ways. Estimation is a strategy for getting as close as possible to an exact answer.</i></li> <li>● <i>The significance of numbers affects the outcome of operations on them.</i></li> <li>● <i>The totals on each side of an equal sign equal each other, similar to that of a balance scale. Real-life situations regarding the increase or decrease of numbers/objects can be applied to addition and subtraction.</i></li> <li>● <i>The overall value of a number is determined by its location within a number.</i></li> <li>● <i>Two and three digit numbers can be compared based on the meaning of the hundreds, tens, and ones digits using the , and = symbols to record the results of the comparisons</i></li> </ul>

Standard Code #	NJ Student Learning Standards
2.OA.1	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.1
2.NBT.1	Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases: a. 100 can be thought of as a bundle of ten tens — called a “hundred.” b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).
2.NBT.2	Count within 1000; skip-count by 5s, 10s, and 100s.
2.NBT.3	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.
2.NBT.4	Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using >, =, and < symbols to record the results of comparisons.

- CRP2. Apply appropriate academic and technical skills.  
 CRP4. Communicate clearly and effectively and with reason.  
 CRP6. Demonstrate creativity and innovation  
 CRP7. Employ valid and reliable research strategies.  
 CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.  
 CRP11. Use technology to enhance productivity.

#### Unit 2 Learning Targets

##### Students will be able to...

- Recognize that groups of even numbers can be counted by 2s and that in groups of odd numbers objects will not pair up evenly
- Write an equation to illustrate that all even numbers can be formed from the addition of two equal addends
- Add up to four two-digit numbers based on place value and properties of operations
- Count within 1000 by ones, 5s, 10s, and 100s beginning at any multiple of 1, 5, 10, or 100
- Add and subtract fluently within ten using mental strategies.
- Use various strategies such as place value, properties of operations, etc. to add and subtract numbers within 50
- Construct, identify and compare sets of numbers to 1,000 using manipulatives to show quantity
- Identify the number of ones, tens and hundreds in a two or three digit number and determine the value of each digit
- Read and write words that represent one, two and three digit numbers
- Estimate and explain the reasonableness of a sum or difference by the magnitude of the answer
- Round to the nearest group of ten when estimating
- Express two and three digit numbers in expanded form
- Compare and order one, two and three digit numbers applying place value concepts and using the symbols  $<$ ,  $>$ ,  $=$

#	Student Learning Objectives	NJSLS	Learning Activity
---	-----------------------------	-------	-------------------

1	Recognize that in groups of even numbers objects can be counted by 2s and that in groups of odd numbers objects will not pair up evenly.	<b>2.OA.3</b>	<ul style="list-style-type: none"> <li>• Have children write the words even and odd on a sheet of paper. Then have them place a connecting cube below each letter in each word.</li> <li>• Have children make pairs with each set of cubes. For each set, ask children to tell how many pairs of cubes they have and how many cubes are left over.</li> </ul>
2	Write an equation to illustrate that all even numbers can be formed from the addition of two equal addends.	<b>2.OA.3</b>	<ul style="list-style-type: none"> <li>• Use Grab and Go! Caterpillar Chase game to practice basic addition facts to move along the game path.</li> <li>• Use MathBoards to show a partner how adding <math>3 + 3</math> can help you find the sum for <math>3 + 4</math>.</li> </ul>
3	Add up to four two-digit numbers based on place value and properties of operations.	<b>2.NBT.6</b>	<ul style="list-style-type: none"> <li>• Use Grab and Go! Soccer Sums game to add 2-digit numbers to score a goal.</li> </ul>
4	Count within 1000 by ones, 5s, 10s, and 100s beginning at any multiple of 1, 5, 10 or 100 (e.g., begin at 505 and skip count by 5 up to 605, or begin at 600 and skip count by 100 up to 1000).	<b>2.NBT.2</b>	<ul style="list-style-type: none"> <li>• Utilize Skip counting video of your liking from YouTube</li> <li>• Starting at a random number, skip count by 5s, 10s, or 100s</li> <li>• Add or subtract 5, 10, or 100 from a given number</li> </ul>
5	Add and subtract fluently within ten using mental strategies (within 10).	<b>2.OA.2</b>	<ul style="list-style-type: none"> <li>• Use triangular flashcards with a partner.</li> <li>• Roll two dice to represent an equation and have partners add or subtract and verbalize different strategies used to solve.</li> <li>• Bump it!</li> <li>• Using playing cards with a partner, each flip over 2 cards and add them. First one to add correctly keeps all the cards.</li> </ul>
6	Use a variety of strategies (place value, properties of operation, and/or the relationship between addition and subtraction) to add and subtract within 50.	<b>2.NBT.5</b>	<ul style="list-style-type: none"> <li>• Use two dominoes to represent 2-digit numbers and have partners add or subtract and verbalize different strategies used to solve.</li> <li>• Roll two dice to represent two 2-digit numbers and have</li> </ul>

			partners add or subtract and verbalize different strategies used to solve.
--	--	--	----------------------------------------------------------------------------

**Selected Opportunities for Connection to Mathematical Practices**

1. **Make sense of problems and persevere in solving them.**
  - SLO #1 Analyze given information in order to make conclusion about even and odd numbered groups.
  - SLO #2 Analyze the relationship between two equal addends in an addition problem in order to form an equation illustrating that all even numbers can be formed from the addition of two equal addends.
  - SLO #6 Analyze the relationship between addition and subtraction and recognize the constraints in the properties of operations in order to add and subtract within 50.
2. **Reason abstractly and quantitatively.**
  - SLO #6 Know and flexibly use properties of operation to solve addition problems within 50.
  - SLO #1 Understand and make sense of quantities of objects in both even and odd numbered groups.
  - SLO #8 Make sense of quantities and their relationships when adding, subtracting, decomposing, and composing numbers within 20.
3. Construct viable arguments and critique the reasoning of others.
4. **Model with mathematics.**
  - SLO #2 Apply previously learned skills regarding addition of even numbers to write an equation illustrating that all even numbers can be formed from the addition of two equal addends.
5. Use appropriate tools strategically.
6. Attend to precision.
7. **Look for and make use of structure.**
  - SLO #1 Recognize and discern patterns about groups of even and odd numbered sets.
8. Look for and express regularity in repeated reasoning.

Unit 2 Essential Questions	Unit 2 Enduring Understandings
<ul style="list-style-type: none"> <li>● <i>How does the position of a digit in a number affect its value?</i></li> <li>● <i>In what different ways can numbers be grouped?</i></li> <li>● <i>How can memorizing the basic addition and subtraction facts help me?</i></li> <li>● <i>How does understanding place value help you solve double digit addition and subtraction problems?</i></li> <li>● <i>What are efficient methods for finding sums and differences?</i></li> </ul>	<ul style="list-style-type: none"> <li>● <i>The position of a digit in a number determines its value.</i></li> <li>● <i>The groupings of ones, tens and hundreds for a given number can be taken apart in different ways.</i></li> <li>● <i>Knowledge of addition and subtraction facts makes the computation of larger numbers easier to solve.</i></li> <li>● <i>Numbers can be aligned in accordance with place value to correctly add denominations of ten. Flexible methods of computation involve grouping numbers in strategic ways. Mental math strategies can be used to solve problems involving numbers.</i></li> </ul>

<b>2.OA.3</b>	Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.
<b>2.NBT.6</b>	Add up to four two-digit numbers using strategies based on place value and properties of operations.
<b>2.NBT.2</b>	Count within 1000; skip-count by 5s, 10s, and 100s.
<b>2.OA.2</b>	Fluently add and subtract within 20 using mental strategies. <sup>2</sup> By end of Grade 2, know from memory all sums of two one-digit numbers.
<b>2.NBT.5</b>	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

 CRP4. Communicate clearly and effectively and with reason.  
 CRP6. Demonstrate creativity and innovation  
 CRP7. Employ valid and reliable research strategies.  
 CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.  
 CRP11. Use technology to enhance productivity.

#### Unit 1 Learning Targets

##### Students will be able to...

- *Write an addition equation with repeated equal addends from a rectangular array that has up to 5 rows and 5 columns to determine the total number*
- *Measure or estimate lengths of objects using appropriate tools (inches, feet, etc.)*
- *Compare measurements of an object obtained with two different units of measure and explain that the difference in the measurements is due to the size of the unit chosen*

- Compare lengths of two objects and determine how much longer one object is than the other using the same standard unit of measure
- Orally count within 1000 including skip-counting by 5s, 10s, and 100s
- Add fluently within 20 using mental strategies
- Choose an appropriate strategy to add and subtract within 100
- Compare lengths to determine the difference in length
- Compare two different measurements taken with different measurement units
- Identify and describe measurable attributes including length, weight, and temperature
- Determine the area and perimeter of squares and rectangles using manipulatives or representative drawings
- Choose and use measurement tools appropriately
- Measure in nonstandard and standard units (half inches, inches, feet, yards, centimeters, meters, pounds, and degrees Fahrenheit)

#	Student Learning Objectives	NJSLS	Learning Activity
1	Write an addition equation with repeated equal addends from a rectangular array with up to 5 rows and 5 columns and solve to find the total number.	2.OA.4	<ul style="list-style-type: none"> <li>• Create a Math foldable of repeated equal addends strategies (equal groups, array, repeated addition, skip counting, and number lines.</li> <li>• Make skyscraper cities with window arrays. Have children label their building to represent the repeated addition equation.</li> <li>• Read <u>Math for All Seasons</u> by Greg Tang for math riddles with repeated addition.</li> </ul>
2	Estimate or measure lengths of objects using appropriate tools (inches, centimeters, feet, and meters).	2.MD.1 2.MD.3	<ul style="list-style-type: none"> <li>• Have children work in pairs using standard measurement tools to estimate and measure lengths of objects in the classroom. Explain how they estimated or measured the objects.</li> <li>• Use Grab and Go! How Long? Game to practice estimating and measuring length.</li> </ul>
3	Compare measurements of an object taken with two different units of measure and explain that the difference is related to the size of unit chosen.	2.MD.2	<ul style="list-style-type: none"> <li>• Have children measure the lengths of objects in 2 different units of measure to explore the inverse relationship between size and number of units.</li> <li>• Measure objects using paperclips and unifix cubes and compare the measurements.</li> </ul>

4	Compare lengths of two objects and determine how much longer one object is than another using the same standard of measure.	2.MD.4	<ul style="list-style-type: none"> <li>Using various standards of measure, measure two objects in the classroom using same measurement tool and compare lengths using the vocabulary longer, or shorter to compare.</li> <li>Measure objects in room using unifix cubes and compare lengths.</li> </ul>
5	Orally count within 1000 including skip-counting by 5s, 10s, and 100s.	2.NBT.2	<ul style="list-style-type: none"> <li>Do jumping jacks while counting by 5s, 10s, and 100s.</li> <li>Orally count within 1000.</li> </ul>
6	Add fluently within 20 using mental strategies, such as decomposing and composing numbers using the ten as a benchmark number.	2.OA.2	<ul style="list-style-type: none"> <li>Use triangular flashcards with partners to add or subtract.</li> <li>Roll two dice to represent an equation and have partners add or subtract and verbalize different strategies they used to solve.</li> </ul>
7	Choose a strategy (place value, properties of operation, and/or the relationship between addition and subtraction) to add and subtract within 100.	2.NBT.5	<ul style="list-style-type: none"> <li>Timed math quiz</li> <li>Magic Number</li> <li>Magic Square grid - using either addition or subtraction, children must fill in the missing numbers in the grid; so that all columns, rows and diagonals totals are equal (the magic number).</li> </ul>

### Selected Opportunities for Connection to Mathematical Practices

- 1. Make sense of problems and persevere in solving them.**  
SLO #1 Analyze the relationship between equal addends in order to write an equation regarding a rectangular array.  
SLO #2 Use concrete models to help estimate and measure lengths of objects.
- 2. Reason abstractly and quantitatively.**  
SLO #1 Make sense of the quantities in the rows and columns in a rectangular array in order to write an equation regarding the array.  
SLO #2 Use quantitative reasoning to create an abstract image of the object being measured or estimated.  
SLO #6 Understand and make sense of the quantities and their relationships to each other when using mental strategies to add, compose, and decompose numbers.  
SLO # 7 Know and flexibly use the properties of operations to solve addition and subtraction equations within 100.
- 3. Construct viable arguments and critique the reasoning of others.**  
SLO #3 Use coherent logic or reasoning to explain the choice of measurement used when measuring various objects.
- 4. Model with mathematics.**

SLO #1 Apply previously learned skills regarding equal addends in order to write an equation regarding a rectangular array.

**5. Use appropriate tools strategically.**

SLO #1 Use appropriate tools (diagrams or models) to write an equation regarding a rectangular array.

SLO #2 Use appropriate tools when estimating or measuring the lengths of objects.

SLO #3 Use appropriate tools and measurement units when measuring various objects of different sizes.

**6. Attend to precision.**

SLO #2 Specify units of measure of the objects being measured (inches, centimeters, feet, and meters).

Unit 3 Essential Questions	Unit 3 Enduring Understandings
<ul style="list-style-type: none"> <li>• <i>What units and tools measure the different attributes?</i></li> <li>• <i>Why are standard units of measurement used?</i></li> <li>• <i>Why are units used in measuring?</i></li> <li>• <i>How are perimeter and area different?</i></li> <li>• <i>How does estimation help us with measurement?</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Specific tools measure specific attributes.</i></li> <li>• <i>A measurement must contain a number and a unit.</i></li> </ul>

Standard Code #	NJ Student Learning Standards
<b>2.OA.4</b>	Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.
<b>2.MD.1</b>	Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.
<b>2.MD.3</b>	Estimate lengths using units of inches, feet, centimeters, and meters.
<b>2.MD.2</b>	Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.
<b>2.MD.4</b>	Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.
<b>2.NBT.2</b>	Count within 1000; skip-count by 5s, 10s, and 100s.
<b>2.OA.2</b>	Fluently add and subtract within 20 using mental strategies. <sup>2</sup> By end of Grade 2, know from memory all sums of two one-digit numbers.
<b>2.NBT.5</b>	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

# Mathematics - Grade 2

## Unit 4: Addition and Subtraction Using Place Value and Measurement

### 21<sup>st</sup> Century Themes

- Creativity and Innovation
- Critical Thinking and Problem Solving
- Communication
- Collaboration

### Career Ready Practices

- CRP2. Apply appropriate academic and technical skills.
- CRP4. Communicate clearly and effectively and with reason.
- CRP6. Demonstrate creativity and innovation
- CRP7. Employ valid and reliable research strategies.
- CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.
- CRP11. Use technology to enhance productivity.

### Unit 1 Learning Targets

#### Students will be able to...

- *Apply properties of place value to mentally add or subtract 10 or 100 from a given number within 100-900*
- *Apply addition and subtraction strategies based on place value and the properties of operations. Also, explain why these strategies work using objects or drawings*
- *Add and subtract within 100 in word problems involving lengths using a symbol to represent the unknown number*
- *Use a number line to represent the solution of whole number sums and differences related to length within 100 by using equally spaced points*
- *Tell and write time using analog and digital clocks to the nearest five minutes using AM and PM*
- *Identify, recognize, and solve word problems with dollar bills, quarters, dimes, nickels, and pennies using the dollar and cent symbols appropriately*
- *Add and subtract within 100 to solve 1 or 2 step word problems with unknowns in any position*
- *Add and subtract fluently within 20 using mental strategies such as decomposing and composing*

#	Student Learning Objectives	NJSLS	Learning Activity
1	Apply properties of place value to mentally add or subtract 10 or 100 to/from a given number within 100-900.	2.NBT.8	<ul style="list-style-type: none"> <li>• Magic Number Activity to 1,000</li> <li>• Using index cards with different 3- digit numbers, students will work in pairs to determine 100 more or less, or 10 more or less of the given number.</li> </ul>

			<ul style="list-style-type: none"> <li>Given a number of the day, students will compute 10 more or less, and 100 more or less</li> </ul>
2	Apply addition and subtraction strategies based on place value and the properties of operations and explain why these strategies work using drawings or objects. For example, $37 + 12 = 49$ because $37 + 12$ equals $30 + 7 + 10 + 2$ (place value) which equals $30 + 10 + 7 + 2$ (property of operations).	2.NBT.9	<ul style="list-style-type: none"> <li>Write equations on index cards and have students break apart the numbers to solve. Have children explain their thinking to a partner.</li> <li>Base Ten Blocks</li> <li>Draw quick pictures to represent place value when adding.</li> </ul>
3	Add and subtract within 100 in word problems involving lengths using a symbol to represent the unknown number. For example, if Angela needs 30 feet of ribbon for gifts, but she only has 17 feet, equations $17 + x = 30$ and $30 - x = 17$ both represent the $x$ feet she still needs.	2.MD.5	<ul style="list-style-type: none"> <li>Draw a model to explain strategy used to solve problem.</li> <li>Underline important data</li> <li>Use the Act it out strategy.</li> <li>Use Bar Models</li> </ul>
4	Use a number line to represent the solution of whole number sums and differences related to length within 100 by using equally spaced points.	2.MD.6	<ul style="list-style-type: none"> <li>Draw a diagram on the number line to help solve problems about length.</li> </ul>
5	Tell and write time using analog and digital clocks to the nearest five minutes using AM and PM.	2.MD.7	<ul style="list-style-type: none"> <li>Use "I Have, Who Has" time game for digital and analog clocks</li> <li>Sort events into the category of AM or PM and assign a specific time to it</li> <li>Practice telling and writing time using student clocks.</li> <li>Read <u>Telling Time</u> by Jules Older to discuss analog and digital clocks</li> </ul>
6	Identify, recognize, and solve word problems with dollar bills, quarters, dimes, nickels, and pennies using the \$ and ¢ symbols appropriately.	2.MD.8	<ul style="list-style-type: none"> <li>Solve word problems involving money using the Act it Out strategy. Use coins and dollar bills to model to solve word problems.</li> <li>How Much is Your Name Worth? Game. Assign letters different coin values and students have to add different combinations of coins based</li> </ul>

			<p>on the letters in their name (first and last name).</p> <ul style="list-style-type: none"> <li>● Read <u>The Coin Counting Book</u> by Rozanne Lanczak Williams to problem solving money word problems.</li> </ul>
7	Add and subtract within 100 to solve 1- or 2-step word problems with unknowns in any position.	2.OA.1	<ul style="list-style-type: none"> <li>● Use bar model representation to diagram the problem showing the unknown. Write the equation using a square for the unknown and solve with a partner.</li> <li>● Draw quick picture to show the addends and minuends to model regrouping.</li> </ul>
8	Add and subtract fluently within 20 using mental strategies, such as decomposing and composing numbers using the benchmark of ten.	2.OA.2	<ul style="list-style-type: none"> <li>● Beat the Calculator game with partners.</li> <li>● Timed Math Quiz to 20</li> </ul>

### Selected Opportunities for Connection to Mathematical Practices

- 1. Make sense of problems and persevere in solving them.**  
 SLO #2 Explain how (using drawings or objects) strategies based on place value or properties of operations work to solve addition and subtraction problems.  
 SLO #3 Analyze the relationship among numbers or quantities in addition or subtraction word problems regarding lengths in order to solve.
- 2. Reason abstractly and quantitatively.**  
 SLO #2 Know and flexibly apply properties of operations as they relate to addition and subtraction problems.  
 SLO #3 Use quantitative reasoning to create a coherent representation of addition and subtraction word problems regarding length.  
 SLO #8 Make sense and understand quantities and their relationships when adding, subtracting, decomposing, and composing numbers within 20.
- 3. Construct viable arguments and critique the reasoning of others.**
- 4. Model with mathematics.**  
 SLO #2 Use drawings and diagrams to help explain strategies related to addition and subtraction.  
 SLO #3 Apply previously learned addition and subtraction skills to solve word problems involving lengths and having unknown quantities represented by symbols.
- 5. Use appropriate tools strategically.**
- 6. Attend to precision.**
- 7. Look for and make use of structure.**  
 SLO #2 Look for and discern patterns relating to addition and subtraction.
- 8. Look for and express regularity in repeated reasoning.**

#### Unit 4 Essential Questions

# Mathematics - Grade 2

## Unit 5: Represent Data and Recognize Shapes and Their Attributes

### 21<sup>st</sup> Century Themes

Creativity and Innovation

Critical Thinking and Problem Solving

Communication

Collaboration

### Career Ready Practices

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP6. Demonstrate creativity and innovation

CRP7. Employ valid and reliable research strategies.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP11. Use technology to enhance productivity.

### Unit 5 Learning Targets

**Students will be able to...**

#### Unit 5 Summary:

- *Gather data through a survey or observation*
- *Organize and display data in more than one way*
- *Interpret data from tally charts, glyphs, Venn diagrams, pictographs, bar graphs, and line plots in terms of most, least, more, less and equal*
- *Solve simple put together, take apart, and compare problems using information from a bar graph and a pictograph*
- *Understand and interpret different types of scales*
- *Show measurement data by making a line plot, where the horizontal scale is in whole number units*
- *Apply addition and subtraction strategies to add and subtract like units and compose or decompose higher value units when needed*
- *Compute sums and differences of one, two, and three-digit numbers within 1000 using strategies based on place value, properties of operations, and/or the inverse relationship between addition and subtraction*
- *Explain why addition and subtraction strategies work using place value and the properties of operations*
- *Measure and repeat measures of several objects to the nearest whole unit then represent the data on a line plot*
- *Draw picture and bar graphs to represent data as well as solve problems using information presented on a bar graph*
- *Draw and identify shapes that have specific attributes*
- *Decompose rectangular and circular objects into two, three, or four equal parts Be able to describe the parts using words such as halves, thirds, etc.*

- *Add and subtract fluently within 20 using mental strategies*
- *Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction*

#	Student Learning Objectives	NJSLS	Learning Activity
1	Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	2.NBT.7	<ul style="list-style-type: none"> <li>• Use Picture Puzzles with equations and a number grid to color a picture. (Similar to mystery pictures, but with equations)</li> <li>• Say a number and have students record multiple equations that will equal the given number in one minute.</li> <li>• Have children use base-ten blocks to represent two 3-digit numbers and then combine to find the total.</li> </ul>
2	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. (Sizes are compared visually or directly, not compared by measuring.) Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	2.G.1	<ul style="list-style-type: none"> <li>• Use books such as, <u>Greedy Triangle</u> by Marilyn Burns and <u>Three Pigs, One Wolf, and Seven Magic Shapes</u> by Grace Maccarone to introduce figures.</li> <li>• Use Shapes (A to V from Conquer Math) to compose and decompose shapes with a partner.</li> <li>• Cut neon index cards into triangles. Then, students can compose other shapes with a partner.</li> <li>• Use Count the Sides game with a partner.</li> <li>• Have children write a list of common objects that are in the shape of various 3-dimensional figures.</li> <li>• Read <u>The Hershey Milk Chocolate Fractions Book</u> by Jerry Pallotta to show geometrical shapes</li> </ul>
3	Use tools of measurement to measure lengths of several objects to the nearest whole unit and represent the data on a line plot	2.MD.9	<ul style="list-style-type: none"> <li>• Measure various objects in the room</li> <li>• As a class, create a line plot based on the number of letters</li> </ul>

	with appropriate whole number units on the horizontal scale.		in each student's name or different pets students have.
<b>4</b>	Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in the graph.	<b>2.MD.10</b>	<ul style="list-style-type: none"> <li>● Use Race to Finish Game to practice recording data on a graph.</li> <li>● Represent and interpret data based on a problem from the lesson.</li> </ul>
<b>5</b>	Partition a rectangle into rows and columns of same-size squares and count to find the total number.	<b>2.G.2</b>	<ul style="list-style-type: none"> <li>● Draw a rectangle on graph paper. Have children identify the number of same-size squares that are in each row, column, as well as the entire rectangle.</li> <li>● Use color tiles to cover different sized rectangles and identify the number of same-size squares that are in each row, column, as well as the entire rectangle.</li> </ul>
<b>6</b>	Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	<b>2.G.3</b>	<ul style="list-style-type: none"> <li>● Given 3 squares (circles, rectangles, etc.) students will partition shapes into halves, thirds, and fourths in different ways.</li> <li>● Decompose two identical wholes (i.e., spilt in half down the middle, or diagonal) to show that equal shares of identical wholes don't need to have the same shape.</li> <li>● Partition index cards in different ways</li> </ul>
<b>7</b>	Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	<b>2.OA.2</b>	<ul style="list-style-type: none"> <li>● Timed Math Quiz</li> <li>● Triangular Flash Cards</li> <li>● Beat the Calculator</li> <li>● Play Around the World</li> </ul>
<b>8</b>	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.	<b>2.NBT.5</b>	<ul style="list-style-type: none"> <li>● In pairs, students will each draw one card from a deck and add or subtract. First one to compute accurately will keep the cards. The goal is to have the most cards when time is up.</li> <li>● Top It!</li> </ul>

			<ul style="list-style-type: none"> <li>● Baseball game with flashcards. Have two teams. Each “batter” answers a question, and takes a base if they get it right. Three people get it wrong, that is three strikes and the other team goes up to bat.</li> </ul>
--	--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Selected Opportunities for Connection to Mathematical Practices**

- 1. Make sense of problems and persevere in solving them.**  
SLO #2 Analyze given information and attributes about unknown shapes in order to draw the specified shape.
- 2. Reason abstractly and quantitatively.**  
SLO #8 know and flexibly use the properties of operations in order to understand the relationship between addition and subtraction.
- 3. Construct viable arguments and critique the reasoning of others.**  
SLO #4 Construct viable and logic arguments based on a picture graph and a bar graph.
- 4. Model with mathematics.**  
SLO #4 Use tools such as diagrams and graphs in order to better identify, create, and analyze the components of a dataset.
- 5. Use appropriate tools strategically.**  
SLO #5 Use appropriate and available tools to partition a rectangle into rows and columns of the same size in order to count the total.
- 6. Attend to precision.**  
SLO #6 Use clear and precise definitions to discuss the division of circles and rectangles into equal shares (for example: half, third, or half of).
- 7. Look for and make use of structure.**  
SLO #8 Look for and discern a pattern or relationship based on place value concepts or properties of operations in the context of addition or subtraction.
- 8. Look for and express regularity in repeated reasoning.**

Standard Code #	NJ Student Learning Standards
<b>2.NBT.7</b>	Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.
<b>2.G.1</b>	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. (Sizes are compared visually or directly, not compared by measuring.) Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.
<b>2.MD.9</b>	Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.
<b>2.MD.10</b>	Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in the graph.
<b>2.G.2</b>	Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.
<b>2.G.3</b>	Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.
<b>2.OA.2</b>	Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.
<b>2.NBT.5</b>	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

Differentiation and Accommodation Strategies
